EDUCATION

University of Washington

2022 – Present

M.S. in Technology Innovation (MSTI), Incoming Fall 2026

B.S. in Human-Centered Design & Engineering, Minor in Neural Computation & Engineering

GPA: 3.94/4.00 | Dean's Medal Nominee for Academic Excellence 2026 (Top 1%) | Dean's List, 2022–2026

PROFESSIONAL EXPERIENCE

Strategy & PMO Intern

Aug 2026 – Present

Fosun International, Banking & Insurance Group

- Conduct market and competitive research across European banking, insurance, and adjacent industries, translating regulatory developments, business models, and company intelligence into strategic recommendations.
- Produce executive-ready due diligence reports and strategic presentations, synthesizing financial, operational, ownership, and regulatory information for senior leadership.
- Support PMO coordination for cross-border initiatives and management reporting by consolidating cross-functional inputs, preparing mid-year performance review materials, and tracking key decisions and follow-up actions.

Founding Product Designer

Aug 2025 – Present

Paira Technology Inc. (Early-Stage Startup)

- Built and launched an AI-native networking app on the App Store on June 30, 2026, owning product strategy and end-to-end UX from concept through release.
- Established the brand and design system, including logo, typography, color, and motion assets, and designed core onboarding, referral, and premium feature flows.
- Recruited 100+ waitlist users and 50+ beta testers, then tested post-launch acquisition through invite campaigns, industry-speaker events, and campus poster activations to refine positioning and channel strategy.

ACADEMIC & PROJECT EXPERIENCE

Undergraduate Research Assistant

Apr – Jun 2026

University of Washington, Human-Centered Design & Engineering

- Investigated the visual representation of professional female athletes on social media, examined how these portrayals intersect with visual media culture, gender discourse, and political rhetoric online.
- Conducted in-depth analysis of social media content through media immersion while developing a qualitative codebook to systematically code and categorize content.

UX Researcher & Designer

Jan – Jun 2025

Cornell Lab of Ornithology & UW Ecofutures Lab

- Led research and product direction for a multi-stakeholder redesign of Merlin Bird ID, identifying key barriers to novice retention and translating insights into actionable product strategies.
- Executed comprehensive mixed-methods research and synthesized findings into prioritized product recommendations; designed the corresponding features, which were adopted and officially launched.
- Presented strategic outcomes to 200+ stakeholders at the UW Capstone Showcase.

Product Design Lead

Mar – Jun 2025

University of Washington, Neural Computation & Engineering

- Led hardware research and assembly for a wearable foot metrics system, owning the full process from concept prototype to interface design of the companion app.
- Synthesized user research findings and aligned technical constraints with design direction, driving consensus across the team.

SKILLS

Design & Research: UI/UX design & research, usability testing, A/B testing, wireframing, interaction design, prototyping, storyboarding, design systems, design engineering, vibecoding

Product Management: Product strategy, market and competitive analysis, due diligence, mixed-methods research

Data & Programming: Data visualization (Altair & Tableau), machine learning, SQL, Python, Java, R, MATLAB

Languages: Chinese (native), English (fluent)
