EDUCATION

University of Washington

2022–2026

M.S. in Human-Centered Design & Engineering (Incoming, Fall 2026)

B.S. in Human-Centered Design & Engineering, Minor in Neural Computation & Engineering, GPA: 3.94/4.00

- Dean's Medal Nominee for Academic Excellence 2026 (Top 1%)
- Dean's List for All Eligible Quarters & Years (2022–2025)

ACADEMIC EXPERIENCE

Founding Product Designer

Aug 2025–present

Pairst Technology Inc. (Early-Stage Startup)

- Built a AI native networking app from 0→1 in a startup environment, defining product direction, core value proposition, and end-to-end user experience from concept to beta launch.
- Established the full brand and design system, including logo, typography, and motion assets to ensure a cohesive product identity.
- Designed and iterated key growth and engagement flows (onboarding, referral, premium features), integrating continuous user feedback and supporting launch with 100+ waitlist users and 50+ beta testers.

Product Manager & UX Researcher

Jan–Jun 2025

Cornell Lab of Ornithology & UW Ecofutures Lab

- Led research and product direction for a multi-stakeholder redesign of Merlin Bird ID, identifying key barriers to novice retention and translating insights into actionable strategies.
- Executed comprehensive mixed-methods research and synthesized findings into prioritized product recommendations adopted in final design proposals.
- Presented strategic outcomes to 100+ stakeholders at the UW Capstone Showcase.

Product Design Lead

Mar–Jun 2025

University of Washington, Neural Computation & Engineering

- Contributed to hardware research and assembly for a wearable foot-metrics system while designing the complete companion app prototype from concept to interface.
- Led research synthesis and team feedback integration, aligning technical constraints, user needs, and own design system.

Product Designer & Researcher

Dec 2023–May 2024

University of Washington, Human-Centered Design & Engineering

- Originated and designed the full rule system and gameplay mechanics for an educational card game translating teamwork theory into interactive learning.
- Created all card content from course material, validating and refining the system through iterative testing with 60+ users.

SKILLS

UI/UX Design & Research, Product Management, Usability testing, A/B testing, Wire-framing, Interaction design, Prototyping, Storyboarding, Design systems, Data visualization (Altair & Tableau), Machine Learning, SQL, Python, Java, R, MATLAB
